Snapshot

Challenger Financial Services Group

Business Description

Challenger Financial Services (CGF) is an Australian annuities issuer and provider of listed and unlisted investment products and services.

Strategy Analysis

CGF's simplified business model will focus on Life and Funds Management, with around \$24bn of assets under management at FY10 after selling most of its mortgage management business in late 2009. Challenger Financial Services Group reported net loss of \$107.9m for the half-year ended 31 December 2008. Revenue from ordinary activities were \$1.06bn, down 21.9% from the same period last year. Diluted EPS was (18.1) cents compared to 15 cents last year. The net operating cash outflow was \$62.4m compared to an inflow of \$106.1m in the pcp. The interim dividend declared was 5 cents in line with last year. Global capital markets remained volatile during the last six months, resulting in difficult operating conditions for all of its businesses. However the Group continues to maintain a prudent level of capital adequacy within Challenger Life No.2 and low levels of debt at Group. While the Group expects markets to remain constrained for some time, the Group remains well positioned to operate through this period and to take advantage of future market recovery.
